News

Dear members and followers of the EAAE activities

First of all, from EAAE, we want to wish to all you a Merry Christmas and a Happy Year 2023!

With this news we would like to announce the call of our project **Space Art** for the year 2023.

Space Art 2023 starts on **January 1, 2023** and the deadline to send your works to participate in our project is **March 31, 2023**.

SPACE ART
VISIONS OF THE UNIVERSE'S BEAUTY

The European Association for Astronomy Education (EAAE) invites students to participate in Space Art contest!

Sponsored by European Southern Observatory (ESO)

The idea of the Space Art is to encourage young students (6 to 18 years old) to imagine about the Universe, to learn about astronomy and discover things for themselves by researching information on an astronomical object.

They just have to look for it in the sky, books or the internet and then draw it or make a picture of it using photography or combined techniques.

Space Art Contest 2023 is organized in three categories: from 6 to 10 years, 11 to 14 years and from 15 to 18 years

The deadline to send the works is March 31, 2023

The winners will be announced on April 22, 2023 in connection with the celebration of Earth Day.

All participants will receive digital certificates on the teacher's e-mail. The winners of 1st, 2nd and 3rd place as well as the incentives in each category will receive diplomas and gifts provided by the European Southern Observatory and the EAAE, which will be sent by mail to the addresses of the schools.

More information about the competition can be found on our website

The winners will be announced on April 22, 2023 in connection with the celebration of Earth Day.

The coordinators of Space Art, as well as the entire Executive Council of EAAE, would like to invite teachers with their students, parents with their sons and daughters, individual students, etc. to participate in the new call of this EAAE project Space Art. All your works will be well received.

We only wish that this project has among you the reception it had last year and that you participate by

sending us your work.

We would also like to ask you to invite your friends and contacts to join our purpose of disseminating astronomy by participating and collaborating in our proposals.

As always you can find all information about this call on our website: <https://eaae-astronomy.org/space-art/>

Thanks a lot.
